Allowable Subject Matter

1. Claims 27-53 are allowed.

The following is an examiner's statement of reasons for allowance: the closest prior art of Chen (U.S. 5,886,736) provides for identifying data of a coded video object based on a start code indicative thereof (col.8 line 65-col.9 line 8), identifying data of a plurality of coded video object layers (VOLs) based on respective VOL start codes (col.16 lines 45-65, also note table 11). However the prior art of Chen failed to teach or suggest either alone or in combination, **identifying data of a plurality of coded video object planes (VOPs) based on respective VOP start codes, each coded VOP being a member of at most one VOL, determining, from data of a first VOL: whether scalability had been applied to the first VOL at coding, and if scalability had been applied, identifying from the coded data of the first VOL data a second VOL that is a reference layer to the first VOL, and decoding a VOP from the first VOL with reference to a VOP of the second video object layer.**

It is for this reason and in combination with all the other limitation in the claims, that claims 27-53 are allowable over the prior art of Chen.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
